Gap Forces Operations to Make Decisions Without Actionable Information

- In The Gap, You Cannot Solve These Problems:**
- Pre-launch, what does order do to profit/cash flow?
 - What is profit of "W.I.P." at all points of an order?
 - Profit changes from cost of materials/outsourcing?
 - Can you "protect" profit at all points in an order?
 - How will you right size to protect planned profit?
 - How does change in labor speed affect profit?
