

REGION

1

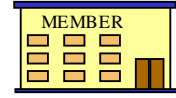

Pre-Activation Testing required.

Region determines whether or not Pre-Activation Testing is required i.e., merchant server hardware/configuration is different from interoperability testing setup.

Visa Payment Gateway Service Pre-Activation and Activation Activities

2

Member, Region and VPGS desk conduct pre-activation testing.

VPGS DESK

REGION

Pre-Activation Testing Not Required.

3 Does it pass testing?
YES NO

Further Interoperability Testing Required.

SYSTEMS INTEROPERABLE!

Assure Production Readiness

Region provides VPGS Production URL and Port Number.

4

First Merchant

All Other Merchants

5

Activation (Production) VPGS has merchant purchase several items and capture the authorized transactions.

Activation (Production) Member sends Pcert. Member processes transactions as business dictates.

6

VPGS will verify that CDC accepted the batch or batches of transactions.

VPGS DESK

7

VPGS will ask the member to verify the receipt and accuracy of TC 57s received the following day.
